

OFFICIAL TEAM FUND AUDIT REPORT

RELAUNCH to JANUARY 31st, 2019

# GREETINGS, CHILDREN OF THE FIRE!

One of the basic tenets behind the Vulcano Project is transparency. As a community project, the Vulcano Team knows that we are beholden to the community – the community is the heart and soul of Vulcano, and we are here to serve your best interests.

A major concern that exists in many cryptocurrency communities surrounds what the team does with premine/team funds. Some projects, like Ripple (XRP), have massive numbers of coins held by their team that they have no specific policy in place to handle. This creates uncertainty in the community and stokes fear that these resources could be misallocated. Other teams have seen developers exit-scam with the premine, leaving the community abandoned, leaderless, and cheated. We shall not allow this to happen with VULC.

In the interest of transparency, we would like to release the first document concerning official team holdings, transactions, and future plans. Thankfully, due to the fact that all of this exists on a blockchain, any member of the community can audit these accounts to see what is being done with the team funds. As of right now, there are too few transactions to justify the expense of a third-party audit, but as we become more active, this is something that will be done in the future.

To the best of our knowledge, a report such as this has never been released to the community by a team detailing all expenses coming out of the premine. While there are many costs not accounted in this, as they are paid for out-of-pocket by the team in fiat (development costs, many marketing expenses, travel, exchanges, etc), this is a full accounting of the VULC premine, compiled to the best of our abilities.

Additionally, as this is the first time we have done this, there are some discrepancies due to best practices having not been in place when we first began. As far as we know, no other project releases information to their community like this, so there was no set standard for how things were

to be handled. Going forward, this has been standardized and should be much easier to compile.

Notable Discrepancies are:

1. The Primary 3rd Party Premine Wallet could not have specific transactions output because it had been moved to a new wallet as the Governance Nodes were set up and the old wallet.dat destroyed as a security precaution. Future releases will have a full and itemized transaction list.
2. The Community Marketing Fund wallet, managed by Nikita, was inadvertently set to staking. The funds staked, resulting in the generation of 77,350 VULC, which will be burnt in the future. For the time being they reside in the Team Premine Fund (TXID: 340a53985f8f4d1afef075f42e65c04f1a3b2fe4b9d3b1608391f6aff7a905a6). This transaction was sent after the closing date of January 31st, so it will reflect on later reports.
3. The Trivia Fund, managed by Alice\_Liddel, was used to test a soon-to-be-released initiative, the Masternodes for Charity project, which involved sending 30,000 VULC out of the wallet. This was to be returned by the end of the month but was returned late (TXID: 6d23b50b8f97a04103755b958ea69f937edf676e06c5665f1f709dc549e478cc). This is why it shows a discrepancy for the closing date of January 31st.

Basic transactions are tracked on the blockchain and are relatively easy to follow but will not be included in this document. For many of these addresses there may be occasional PoS transactions or block rewards as the wallet is unlocked to send coins. Due to the automatic use of change addresses, some of these funds move through many different addresses in the same wallet. Where possible, we have included destination addresses, but have anonymized the names.

Note: Balances displayed are as of January 31st, 2019.

# OFFICIAL VULCANO TEAM HOLDINGS

**3rd Party Premine Address:**

**Final Balance: 8,355,042.0000 VULC**

**Note:** This account is held in trust by a 3rd Party. It is used to set up, configure, and run the Governance Masternodes. The team has no direct access to these funds whatsoever.

As this wallet is used primarily for Network Security, it has been used to set up and run various Masternodes and to stake during the network stabilization phase. This resulted in the generation of 152,602.00 VULC, which will be burnt at a later date.

**ACCOUNTING NOTE: 152,602.00 VULC TO BE BURNT**

**Governance Masternodes: 200 Masternodes Permanently Locked for Governance Purposes**

**Total Balance: 10,000,000 VULC**

**Note:** On January 25th, 2019, the Vulcano Team established 200 masternodes to complete testing on the next version of the Vulcano Wallet, which will include governance. These masternodes will stay permanently locked and will not be available for sale. Any VULC generated during the testing period via masternode rewards will be burnt publicly for the community to see at a later date.

**The TXIDs of the Masternodes can be found here:**

Team Premine Addresses:

Final Balance: 2,559,589.2498 VULC

**Note:** This is the main account for team funds. Several large transactions can be seen moving in and out to sub-accounts for dispersal for Trivia or Bounties. This address is managed by Vygur. This is the primary account for the payment of bounties and other daily expenses. There was a single stake of 175 VULC, which will be publicly burnt at a later date.

ACCOUNTING NOTE: 175 VULC TO BE BURNT

Community Marketing Wallet

Final Balance: 0 VULC

**Note:** This was an account which made transactions for community initiatives led by Nikita. While it is no longer in use, this wallet was used by Nikita. Due to a configuration error, the wallet was staking during much of its existence leading to the generation of 77,350 VULC. This will be burnt publicly at a later date.

ACCOUNTING NOTE: 77,350 VULC TO BE BURNT

Trivia Wallet

Final Balance: 9200 VULC

**Note:** This stated balance does no include the 30,000 VULC which were sent back to the wallet on February 3rd (TXID: 6d23b50b8f97a04103755b958ea69f937edf676e06c5665f1f709dc549e478cc) after the successful testing of the Masternodes for Charity Proof of Concept. There were no stake rewards.
